PROFESSIONAL SUMMARY

Associate Software Engineer with 2+ years of production experience building enterprise web and mobile platforms. Proficient in Python (Django), PHP (Laravel), REST APIs, and payment/KYC integrations for high-traffic event-tech and registry systems serving 20,000+ users. Skilled in OOP design, unit testing, CI/CD, query optimization, and cross-functional delivery with global teams.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, PHP 8.x, Java
Frameworks	Django, Laravel, CodeIgniter, React, Next.js, React Native, Expo, Node.js, FastAPI, Flask
Databases	MySQL, PostgreSQL, MongoDB, Redis
APIs & Integrations	RESTful APIs, OAuth, JWT, Razorpay, PayU, PayPal, CCAvenue, IDfy KYC, APNIC Registry API, GST, PAN, Udyam, MCA verification
DevOps & Cloud	Git, GitHub Actions, AWS (EC2, S3, App Runner), GCP, Docker, Linux
Testing & Tools	pytest, PHPUnit, GitHub Copilot, Streamlit, Google Gemini, Elasticsearch

PROFESSIONAL EXPERIENCE

Software Developer	Nov 2023 – Present
SCI Knowledge Interlinx Pvt. Ltd. · Pune, India	
- Developed and maintained client-specific Python (Django) and PHP (Laravel) platforms following OOP and SDLC standards, delivering on estimated timelines with low post-release defect rates. - Built REST APIs and microservices with OAuth, JWT, and role-based access control serving 20,000+ concurrent users across multi-tenant B2B and event registration platforms. - Delivered NIXI Internet Exchange membership system (Laravel 12): multi-stage approval workflows, automated billing and invoicing, PayU wallet integration, IDfy KYC (GST, PAN, Udyam, MCA), GitHub Actions CI/CD, and MySQL master-slave replication on Linux and Apache. - Built IRINN portal with APNIC Registry API integration for WHOIS and route management, multi-role RBAC, grievance ticketing, DomPDF invoicing, legacy data migration, and zero compliance incidents in production. - Architected Event Operations Platform (Django 5) for Bengaluru Tech Summit: config-first multi-event ticketing, exhibitor lifecycle, dual payment gateways (CCAvenue, PayPal), floor and booth management, Celery, Redis, and admin analytics. - Built high-availability event registration system (Laravel) with Razorpay, PayU, and CCAvenue; enhanced Interlinx B2B portal (CodeIgniter, 5,000+ users) with intelligent table allocation and meeting booking workflows. - Improved performance through query optimization, Redis caching, and Elasticsearch indexing; authored pytest and PHPUnit test suites; mentored junior developers via code reviews and pair programming.	

PERSONAL PROJECTS

TruckTrace — Cross-Platform Logistics App
Freelance Mobile Developer · Independent Client · East Africa
- Developed customer-facing freight logistics app (React Native, Expo, TypeScript) for quote requests, live trip tracking, invoicing, and payments — integrated with 40+ REST endpoints, JWT refresh tokens, FCM push notifications, and Google Maps. - Shipped production builds for Android and iOS via EAS; implemented secure auth (OTP, Expo Secure Store), support ticketing with in-app messaging, and payment workflows for cash, bank transfer, and mobile money.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering	Aug 2019 – May 2023
Visvesvaraya Technological University, Bangalore
